

Kartiken Sharma

Data Scientist

kartikensharma25@gmail.com 7505587325

PROFESSIONAL SUMMARY

Highly accomplished Artificial Intelligence and Machine Learning professional with expertise in designing and implementing cutting-edge sequence architectures, including Transformers, and a strong foundation in scalable digital infrastructure. Proven track record of delivering precision-driven solutions through the development of multimodal research pipelines and leadership of real-world tech projects. Skilled in driving innovation and excellence in AI-driven solutions, with a passion for leveraging technology to drive business growth and transformation.

WORK EXPERIENCE

Youth Warrior Foundation - Data Scientist (Aug 2023–Present)

Spearheaded AI-driven projects, resulting in a 25% increase in engagement among 10,000+ youth participants (June 2024–July 2024) and a 30% increase in the following year (June 2025–July 2025).

Developed and implemented a machine learning model that improved predictive accuracy by 40% for identifying at-risk youth, enabling targeted interventions and support.

Zintellix - Remote Data Scientist Intern (Remote) (2022–2023)

Completed a Bachelor of Technology in Computer Science with a specialization in Artificial Intelligence and Machine Learning, demonstrating a strong foundation in AI and ML principles.

Utilized Python and R programming languages to analyze and visualize complex datasets, enhancing data-driven decision-making capabilities.

PROJECTS

Multi-Scale Hybrid CNN-Transformer for Chest X-Ray Disease Classification, AI-Powered Competitive Analysis Tool, Student Career Helper

Developed MS-HYBRID CXR Classifier, a hybrid DenseNet-121 and SwinTransformer model for classifying 14 thoracic diseases using the NIH chest X-ray dataset, achieving a 0.7850 macro AUROC with Grad-CAM visualization for interpretability.

Built a Streamlit web application leveraging LangChain and LangGraph to automate corporate SWOT analysis research, streamlining competitive intelligence workflows and exporting structured analytical data into CSV format.

Built a student career helper platform using React for the frontend and FastAPI with SQL/PostgreSQL for the backend, integrating an AI chatbot and ML model to deliver personalized career guidance and recommendations to students.

EDUCATION

Bachelor of Technology in Computer Science with Specialization in Artificial Intelligence and Machine Learning, University of Petroleum and Energy Studies (UPES), Dehradun, Uttarakhand (2022–2023)

Class 12th, Jimp Pioneer School, Dehradun, Uttarakhand (Year of Passing: [InsertYear])

Class 10th, Jimp Pioneer School, Dehradun, Uttarakhand (Year of Passing: [InsertYear])

SKILLS

Technical: Python, C/C++, React, FastAPI, SQL&PostgreSQL, REST APIs, Machine Learning &Deep Learning (PyTorch, TensorFlow, Transformers), LangChain &RAG Architectures, AWS, Git/GitHub

Soft Skills: Agile Collaboration, Digital Advocacy, Stakeholder Collaboration, Community Outreach
